8ea2c1e0-e344-490b-936b-ac3c8046ad58	When I go to typing out on the Create a story part, the text overlaps and doesn't let me edit pre-existing text. I also can't upload longer stories even though I know this is possible. I upload the app again, and it updates to a different version with the likes button at the bottom right. Then, when I close and open again, it's back to upper right with the + sign. Choose a version! Bugs all over. Can't post, and it deletes my drafts!		<b>When I go to typing out on the Create a story part, the text overlaps and doesn't let me edit pre-existing text. bb62988a-27e2-4379-917b-a394aeb005c2		What is going on with this app? Text disappearing from under my Reels when I publish. Video flipping UPSIDE DOWN when I publish Reels. Can't change Highlights order. It's so bad. All after checking for updates, restarting phone, etc.	<b>What is going on with this app? Text disappearing from under my Reels when I publish. 21501001-d628-486f-bc76-5a17bea207ec		Unreliable at best. Buggy, especially w/newest updates. Constant changees make using a chore. Poor upload capabilities and unstable overall. It's 50/50 if it works or not each time I use it. Glad I don't count on this as my featured account.	<b>Unreliable at best. Buggy, especially w/newest updates. Constant changees make using a chore. bce0162c-d2cb-4de2-b7e6-63f45c41f070		Photo editing need a massive updates.. The result isn't appear as the edited files. Wasting time to rotate, crop, and the final posted photo appearance not synchronized	<b>Photo editing need a massive updates.. The result isn't appear as the edited files. Wasting time to rotate, crop, and the final posted photo appearance not synchronized at all.. my goodness 🤔</b>
Total	<b>Every few updates, Instagram ruins their sound settings and makes stories play at full volume by default. Abysmal user experience. We use our phones for music, or sometimes do not want some loud video to start playing in a public setting. You've broken this and fixed it before. Now you have broken it again. Fix it.</b>	<b>I don't have major issues with this app. I just can't believe that after dozens of updates, the text in the reels is still sooo hyper-sensitive and after you hit publish, it's often all distorted. It happens because every little edit you do on a text block, you need to press "ok". Using other apps (I don't mention the name :)), I realized there are much more efficient and reliable systems for text editing: I hope to see soon a change in IG too! One last word about the algorithm: CRUEL!</b>	<b>Every few updates, Instagram ruins their sound settings and makes stories play at full volume by default. Abysmal user experience.
